

Silently protecting

Arxada is a global leader in innovative solutions that protect our world.

Our technologies work behind the scenes as silent protectors that keep products, materials, and processes safer, more stable, and performing at their best.

We help customers across essential industries solve complex microbial control challenges with advanced solutions built for today's needs and tomorrow's expectations.

By combining scientific excellence with real world practicality, Arxada ensures the products people rely on every day are protected—quietly, effectively, and responsibly.

Our competitive strengths

Microbial control powerhouse

One-stop shop with global reach

Unparalleled regulatory support

Leading technology platforms

Our primary end markets

Professional Hygiene

Paints & Coatings

Home & Personal Care

Wood Protection

Human Health & Nutrition

Key facts & financials

2bn sales in 2025 CHF

3,100 employees

14 R&D centers

24 manufacturing facilities

Growing innovation pipeline

970 EPA & BPR Registrations

4,500 customers in over 100 countries

Global presence locally manufactured across Americas, EMEA and APAC

A story of innovation. Protecting tomorrow, today

Arxada's story is built on decades of scientific leadership, rooted in a unique combination of microbiology, chemistry, and chemical engineering expertise. This foundation enables us to pioneer the next age of microbial control innovation, supported by unparalleled regulatory insight, CDMO capabilities, and deep technical experience across global markets.

Our scalable and adaptable technology platforms allow rapid deployment across diverse applications—from Professional Hygiene, where solutions such as Quanticare™ and Peraguard™ deliver high performance disinfection in institutional, industrial, and healthcare environments, to Paints & Coatings, where technologies like TIME and Polyboost™ enhance durability, stability, and microbial protection across both in-can and dry film systems.

In Wood Protection, trusted offerings including Tanasote® and Tanalith® extend the longevity and sustainability of timber used worldwide, while in Home & Personal Care, preservation and formulation technologies such as Geogard® and Geomulse™ help customers develop safer, more stable, and more sustainable consumer products.

Across Human Health & Nutrition, our scientific capabilities support the integrity, performance, and reliability of pharmaceutical and nutritional products from development through delivery. Together, these technologies form advanced, reliable solutions that safeguard products, processes, and infrastructure—quietly and effectively—empowering customers and protecting what matters through the power of science.

Our behaviors

Our behaviors are the foundation of how we work, lead, and deliver for our customers. They reflect what we stand for as an organization and guide the decisions we make every day—from how we collaborate internally to how we show up for our partners, communities, and the world. These behaviors are more than expected; they are the shared commitments that shape our culture, strengthen our performance, and ensure we succeed together.

Go Beyond

Set ambitious goals, think big, show courage and embrace calculated risks.

Decide & Drive

Empower your teams, be creative with resources, involve the right decision makers and do not over-engineer.

Collaborate Always

Invite and embrace different opinions, maintain accountability, work across business segments and functions and stay connected.

Foster Grit

Support each other in difficult times, recover from setbacks, persevere without giving up and prioritize time to recharge.
